Full finger NEOPRENE Gloves

The uniqueness of this glove is found on the fact that we have chosen to cover your hand 100% with neoprene; palm, hand back, fingers and side walls. With this we ensure that you will continue to have warm hands even if the glove gets wet, which is extremely important when you sail under wet conditions or when you are tied to the steering wheel. For a better grip Kevlar has been added on top of the palm.
